

Science & Technology

Publications

- **The binding of advanced glycation end products to cell surfaces can be measured using bead-reconstituted cellular membrane proteins.**
Schmitt, A., Nöller, J., Schmitt, J.
Biochim.Biophys.Acta-Biomembranes (2007), in press
- **ADME related profiling in 96 and 384 well plate format- A novel and robust HT-assay for the determination of lipophilicity and serum albumin binding.**
Hartmann, T., Schmitt, J., Röhring, C., Nimptsch, D., Nöller, J., Mohr, C.
Current Drug Delivery 3 (2006) 181-192
- **From Early Drug Discovery to Clinical Trials**
Nöller, J., Schmitt, J., Hartmann, T., Löffler, T
Screening: Trends in Drug Discovery Vol. 6 (3, 2005) 48-49
- **Just Married – in vitro and in silico ADME Prediction**
Nöller, J., Schmitt, J., Hartmann, T.
Screening: Trends in Drug Discovery Vol. 6 (1, 2005) 32-33
- **Role of lipophilicity and protein binding in ADME prediction**
Nöller, J., Schmitt, J. Machamer, J.
Drug Plus International (Nov. 2005) 1-3
- **Characterization of advanced glycation end products for biochemical studies: Side chain modifications and fluorescence characteristics.**
Schmitt, A, Schmitt, J, Münch, G, Gasic-Milenkovic, J
Anal. Biochem. 338 (2005) 201-215
- **Characterization of advanced glycation end products: Mass changes in correlation to side chain modifications.**
Schmitt, A, Gasic-Milenkovic, J, Schmitt, J
Anal. Biochem., 346 (2005) 101–106
- **Two analytical methods to study the interaction of AGEs with cell surface proteins.**
Schmitt A., Meiners I., Schmitt J., Nöller J., Ihling Ch., Sinz, A., Münch G., Nieber, K.
J. Biochem. Biophys. Meth. 65 (2005) 121-36
- **Lipophilicity- beyond octanol/water: a comparison of modern technologies**
Hartmann T. and Schmitt J.
Drug Discovery Today: Technologies 1 (4, 2004) 431-439

- **Multilamellar liposomes and solid-supported lipid membranes (TRANSIL): Screening of lipid-water partitioning towards a high-throughput scale**
Loidl-Stahlofen A., Hartmann T., Schöttner M., Röhring C., Brodowsky, H., Schmitt, J., Keldenich, J.
Pharm. Res. 18 (12, 2001) 1782-1788
- **Polymer Cushions in Supported Phospholipid Bilayers Reduce Significantly the Frictional Drag between Bilayer and Solid Surface**
Schmitt J., Danner B., Bayerl T.M.
Langmuir, 17 (2001) 244-246
- **Solid-Supported Biomolecules on Modified Silica Surfaces – A tool for fast physicochemical characterization and High-Throughput Screening**
Loidl-Stahlofen A., Schmitt, J., Nöller J., Hartmann T., Brodowsky, H., Schmitt W., Keldenich, J.
Adv. Materials, 13 (23, 2001) 1829-1834
- **Solid-Supported Lipid Membranes as a Tool for Determination of Membrane Affinity: High-Throughput Screening of a Physicochemical Parameter**
Loidl-Stahlofen A., Eckert A., Hartmann T., Schöttner M.
J. Pharm. Sci. 90 (2001) 599-606
- **Physiology-based pharmacokinetic modelling: ready to be used**
Schmitt W. and Willmann S.
Drug Discovery Today: Technologies 1 (4, 2004) 449-456
- **A Physiological Model for the Estimation of the Fraction Dose Absorbed in Humans**
Willmann, S.; Schmitt, W.; Keldenich, J.; Lippert, J.; Dressman, J.B.
J. Med. Chem. 47 (16, 2004) 4022-4032
- **High-Throughput Determination of the Free Fraction of Drugs strongly Bound to Plasma Proteins**
Schuhmacher J., Kohlsdorfer C., Bühner K., Brandenburger T., Kruk R. J.
Pharm. Sci. 93 (2004) 816-830
